

COOPERATIVE AGREEMENTS WITH PRIVATE NONPROFIT VOCATIONAL REHABILITATION SERVICE PROVIDERS

VR attributes its success in part to long-standing relationships with a network of private and nonprofit community rehabilitation facilities/programs located throughout Georgia. These facilities provide a wide variety of employment and work readiness services to VR consumers that include vocational evaluation and training; work adjustment and skills training; supported employment and job coaching; job development, placement, and retention; extended/transitional employment; and specialized services for persons who have visual or hearing impairments.

The VR Program understands the need for additional service providers to maximize service efforts for unserved and underserved populations in rural areas throughout Georgia. Through these partnerships, VR has developed 331 service agreements and contracts to meet the needs of consumers in rural counties. These include 258 agreements with non-CRPs and 30 agreements with CRPs. Of these agreements, 98 are for supported employment.

Cooperative agreements (including contracts and/or memoranda of understanding) have been established with all entities from which VR purchases services. Each agreement:

- Defines the scope and nature of services provided by both agencies.
- Establishes principles for the development of working between the two agencies.
- Establishes criteria by which the cooperative operations may be reviewed and evaluated in order to determine their effectiveness.
- Defines programs and establish criteria for admission, monitoring and successful completion of services.

Contents of each cooperative agreement include:

- Purpose of the agreement that outlines program services, number of persons to be served, and timeframe for provision of services.
- Legal basis for handling interagency disagreements.
- Role, function, and responsibility of each agency, and referral and reporting procedures.
- Consumer staffing and consumer rights to informed choice about their vocational rehabilitation program.
- Financial procedures for submission of invoices for services provided, and payment amounts and schedules based on consumer outcomes.
- Supervision and number of work hours for each consumer receiving services.

STATE GEORGIA

YEAR 2008

- Outcome measurements.
- Statement of assurance of compliance.

Each agreement is reviewed at least annually. If needed, agreements are amended based on changes in law and/or methods for improving the provision of services.
